

Lightroom Overview

This is a special workshop being given to a private photography organization

Tuesday, Wednesday, Thursday, February 6th, 7th, 8th 2018 6:30pm – 8:30pm

Location: Private Location

Lightroom (LR) has gained rapid acceptance by millions of photographers because it provides the ultimate in organization, efficiency and improved image processing. Currently being offered by Adobe as both a “purchased” program as well as a “subscription,” LR is THE standard for photographers’ image editing and organization.

This seminar is an overview of importing information about your images into LR and the Develop module. Importantly, you will learn how to organize your images for optimal use within LR and will be provided with a simple and logical roadmap for backing up your LR catalog and your invaluable images. We will go through the LR Preferences so you can properly set them for the most efficient LR processing and performance. We will then go through basic image editing using the very capable Develop module.

After attending the seminar, you will have a solid understanding of LR’s image processing and organizational features and be ready to begin using this amazing program.

Please [EMAIL ME](#) if you have questions or would like to reserve your spot.

What some past participants have said:

“Some may possess your extensive knowledge, but not your ability to convey it in such an organized and multi-level way. Thanks for taking the time to teach us!” KO

“Thank you, thank you for a fabulous and comprehensive introduction to Lightroom. You are an amazingly clear and comprehensive instructor.” CW

“Ordinarily I am unable to sit for so very long; but one measure of how interesting, educational and entertaining your class was is that I never stood up to give my aching rear end and back a break during your workshop.” LP

“I have been trying to use Lightroom for a couple of years without much success mainly because I was so confused about where my pictures/files were that I was

easily frustrated while trying to learn the program. Your discussion of the different modules and how they worked, particularly the Library Module helped me tremendously. I now know exactly where the files are and am excited to learn more about Lightroom.” MR

“Many thanks for your Lightroom Overview class and for the handouts you provided. It was very informative and the pace was just right for me. I will start moving my 30,000 images into and organized folder structure as you suggested and move to and begin using Lightroom ASAP. And I will start shooting in RAW!” SP

Your workshop inspired me to finally embark on creating a systematic folder structure in Lightroom for my photos....and to acquire a couple of external hard drives for security and backup. It was a valuable workshop experience. KK
